Drawings

3. Drawings filed on 7/22/03 have been approved by the examiner.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

Claims 1-20 are allowed.

The present invention is directed for providing an electronic status notification message for an output job request. Each of the independent claim recites uniquely identifying features of "producing similarity data by evaluating the archive of the document with other documents in the document repository; receiving job status information concerning the output job request forwarded to the output device; preparing the electronic status notification message using static and dynamic data concerning the job status information of the output job request and the similarity data of the document archived in the document repository". The closest prior art to Stringham (US Pub. No. 2004/0145771 A1) and Carlson et al. (US 6,842,898 B1) provides a conventional status request information for a print job but either reference fails to anticipate or render the above limitations obvious.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other prior art cited

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Onaga (US 5,862,404) discloses a network device discovery and status information distribution using independent information distribution processes.

Manglapus et al. (US 6,219,151 B1) disclose a network printing system.
